

Casinos Suppression Plan

The following proposal contains alternative restrictions and modified operational procedures for any Gilpin County casino that wishes to reopen; replacing and/or modifying the restrictions imposed by Amended PHO 20-28, in which casinos were ordered to fully close to prevent the spread of COVID19. Each casino licensee will be required to follow the policies and procedures outlined below, adhering to this and any other alternative restrictions as required by the Colorado Department of Public Health and Environment (CDPHE) Safer at Home Order.

Employees and Vendors

All employees, including contracted workers, and vendors entering a casino property must wear, at a minimum, a cloth or surgical face mask.

Employees shall be monitored daily for symptoms, and symptomatic employees shall be excluded from the workplace and isolated until they are fever free for 72 hours, other symptoms have improved, and at least 10 days have passed since they became symptomatic.

Employees will be required to complete the health assessment screening prior to starting each shift. All vendors will complete the same health assessment screening before entering the premises. Health screenings include a temperature check and questionnaire response (e.g. experiencing cough, shortness of breath, etc.).

Any vendor that does not meet health requirements will not be allowed on premises.

Employee areas will be modified in such a manner as to allow for social distancing of at least six (6) feet. Signage to mandate frequent hand-washing will be installed in prominent areas.

Signage with reminders on how to keep employees and guests safe will be posted prominently in all employee break areas.

All operators shall provide accommodations for employees at higher risk of severe illness from COVID-19 who remain encouraged to follow the Stay at Home requirements.

Facility

In order to achieve 6 ft social distancing, the limit pursuant to this variance is 50% of the posted occupancy code limit ensuring a minimum 28 square feet per person not to exceed more than 175 people at any given time in a confined indoor space, and 250 people in any outdoor setting.

Each casino will designate at least two emergency contacts that are available to be reached at any time in the event the Gilpin County Public Health Department or Sheriff's Office needs to contact them regarding public health matters related to the casino. Contact persons designated must be able to respond quickly to any public health concerns as directed by the Gilpin County Public Health.

Appropriate signage will be installed throughout the facility:

- Entrance requirements / health screening at all entrances: signage on doors inform guests that are experiencing COVID-like symptoms not to enter. Recommend that the sign posted at the door is the CDC sign (also available in Spanish) https://www.cdc.gov/coronavirus/2019-ncov/downloads/316129-B-StayHomeFromWork_Poster.pdf
- Hand washing recommendations in each restroom
- Partition or close off bathroom urinals to ensure adequate social distancing
- Reminders to wear masks throughout the facility
- Hand sanitizing and social distancing reminders at strategic locations throughout the facility

All guest services locations will be equipped with physical barriers (plexiglass).

Every area where guests queue will be marked with proper distancing measurements of at least six (6) feet.

ATMs, ticketing and marketing kiosks will be sanitized once per hour.

Guests will be limited to one family unit per elevator. Appropriate signage will be placed at each elevator bank/door.

Guest valet services will not be available.

Gilpin County Public Health will work with each property to create a site-specific plan to ensure adequate air ventilation and circulation in each facility. Given the huge variations in the size and age of the buildings that house casinos in the county, it is not possible to craft a blanket protocol that would be applicable to every casino.

Kitchen cleaning and maintenance protocols will remain as established, with the exception that kitchen staff will wear masks throughout their shift.

Hotel cleaning and room maintenance will remain as established, with the exception that high-contact surfaces (countertops, tables, etc.) and objects (remotes, room keys, faucets, doorknobs, pens, etc.) will be cleaned thoroughly after each guest. Any hotel room where a COVID-positive guest has stayed will be quarantined for a minimum of 24 hours after notification of the guest's positive status.

Any fires or fire alarms will be managed according to current hotel policy.

Should the need arise for casino staff or guests to dial 911 for emergency services, standard facility policy will be followed. Each guest has been verified as asymptomatic before entry to the casino, so any law enforcement or medical response is assumed to be for reasons other than COVID-related.

Retail spaces will operate according to current state public health orders for retail operations.

Bars and nightclubs will remain closed. Alcohol service will be limited to slot machine delivery only.

All restaurants and buffets will operate according to the current state order governing food service.

Meeting and convention spaces will remain closed.

Pools, spas, and gyms will remain closed.

Guest Management

Casino employees will be situated at all guest points of entry to screen health assessments, ensure masks are worn- required of all guests, unless wearing a mask is detrimental to the guest's health, and inform guests of expanded public health protocols.

The Health Screening includes a temperature check and the following questions:

- Do you have any of these symptoms?
 - Dry Cough
 - Shortness of breath
 - Fever
 - Chills
 - Muscle pain
 - Headache
 - Sore throat
 - Loss of taste or smell
- Have you been in contact with a person confirmed by a healthcare professional or lab result to have COVID19?

Any guest answering yes to any of these questions, or who present with a temperature of 100.4 or higher will not be allowed to enter the premises. They will also be advised to consult with a physician to determine proper course of action.

All guests will be reminded that vulnerable populations—those over 65 years of age and anyone with an underlying health condition—should stay at home or recreate outdoors under the “Safer at Home and in The Great, Vast Outdoors” Order.

Guests entering a casino equipped with a Player's Card will be strongly encouraged to use the card while in the casino. Should a COVID case or cases present at that casino, the Player's Card information will be used for contact tracing efforts. Guests that do not have a Player's Card will be strongly encouraged to acquire one and use on premises. If the guest does not have a Player's Card and does not wish to get one, they will be asked to provide contact information including name, address, phone number, date and time of entry, and acknowledgement that they have completed the health screening upon entry.

Guests entering a casino not equipped with a player's card system will be asked to provide the same contact information as noted above upon entry.

Gaming Floor

Table games will remain closed. CDPHE and Gilpin County Public Health will revisit opening table games in three weeks (on or about June 27, 2020).

Every other directly adjacent slot machine will be turned off. Casinos will take all reasonable measures to ensure that every operational slot machine is sanitized before a player sits at the machine, by implementing either a system-driven notification (the machine itself alerts staff the player has stopped playing), or a process by which casino staff monitor machines for departing players and make their best effort to sanitize the machine before a new guest begins play. Machines will also be sanitized on a regular schedule.

Hand sanitizer and cleaning wipes will be widely available on gaming floor so guests are able to clean their hands or wipe down a machine before starting to play.

Guests will be prohibited from congregating around any slot machine.

The gaming floor will be cleaned using current continual cleaning protocols. In addition, specified areas of the floor will be closed on a rotating basis to ensure each area of the gaming floor is deep cleaned at least once in a 24-hour period. For casinos opting not to stay open for 24 hours, deep cleaning may occur overnight.

Any closing of the slot machines cannot be done in such a manner to intentionally improve the odds in favor of the house when it comes to payouts.

Transportation

Any bus systems that transport people to the casinos must be thoroughly cleaned and disinfected on a daily basis and cleaned between each transport.
